– Lincolnshire-based logo design –

Portfolio

This is my logo portfolio. The logos below are my work. The reason the logos below look 'blurry' and pixelated is because I deliberately added them to this document that way, in order to stop people from stealing my designs (although, admittedly, there probably was no point in me doing that).

The icons on these logos (the pictures above the logo text - for example: the orange boat on the 'DeepSeaMiningOnline logo) were not taken from 'clipart' sites, or other services providing royalty-free/cc0 licence/public domain images. Rather, these icons are my own work. As proof of this, if you screenshot an icon from these logos, then do a 'reverse image search' you will not find these icons on other websites.

I have added a credit on each logo, which reads 'Logo by EduardoConceicao.com', or something similar. This credit text has been written in the same typeface (the same 'font') as was used in its respective logo. I did this to kind of prove that I made the logo.

If you would like me to make a logo for you, I can be found at www.EduardoConceicao.com
